

# PUMP TRACK

TOLMIN

"Pumptrack" kolesarska steza je sestavljena iz zaobljenih grbin in zavojev, ki so med seboj ritmično povezani v krožno zanko. Razgibana steza omogoča pestro in zabavno, a hkrati varno vožnjo. Primerna je za vse velikosti koles, rolke, rollerje in skiroje. Po stezi kolesarjem ni treba vrteti pedal, saj se gibajo s premikanjem telesa navzdol in navzgor.

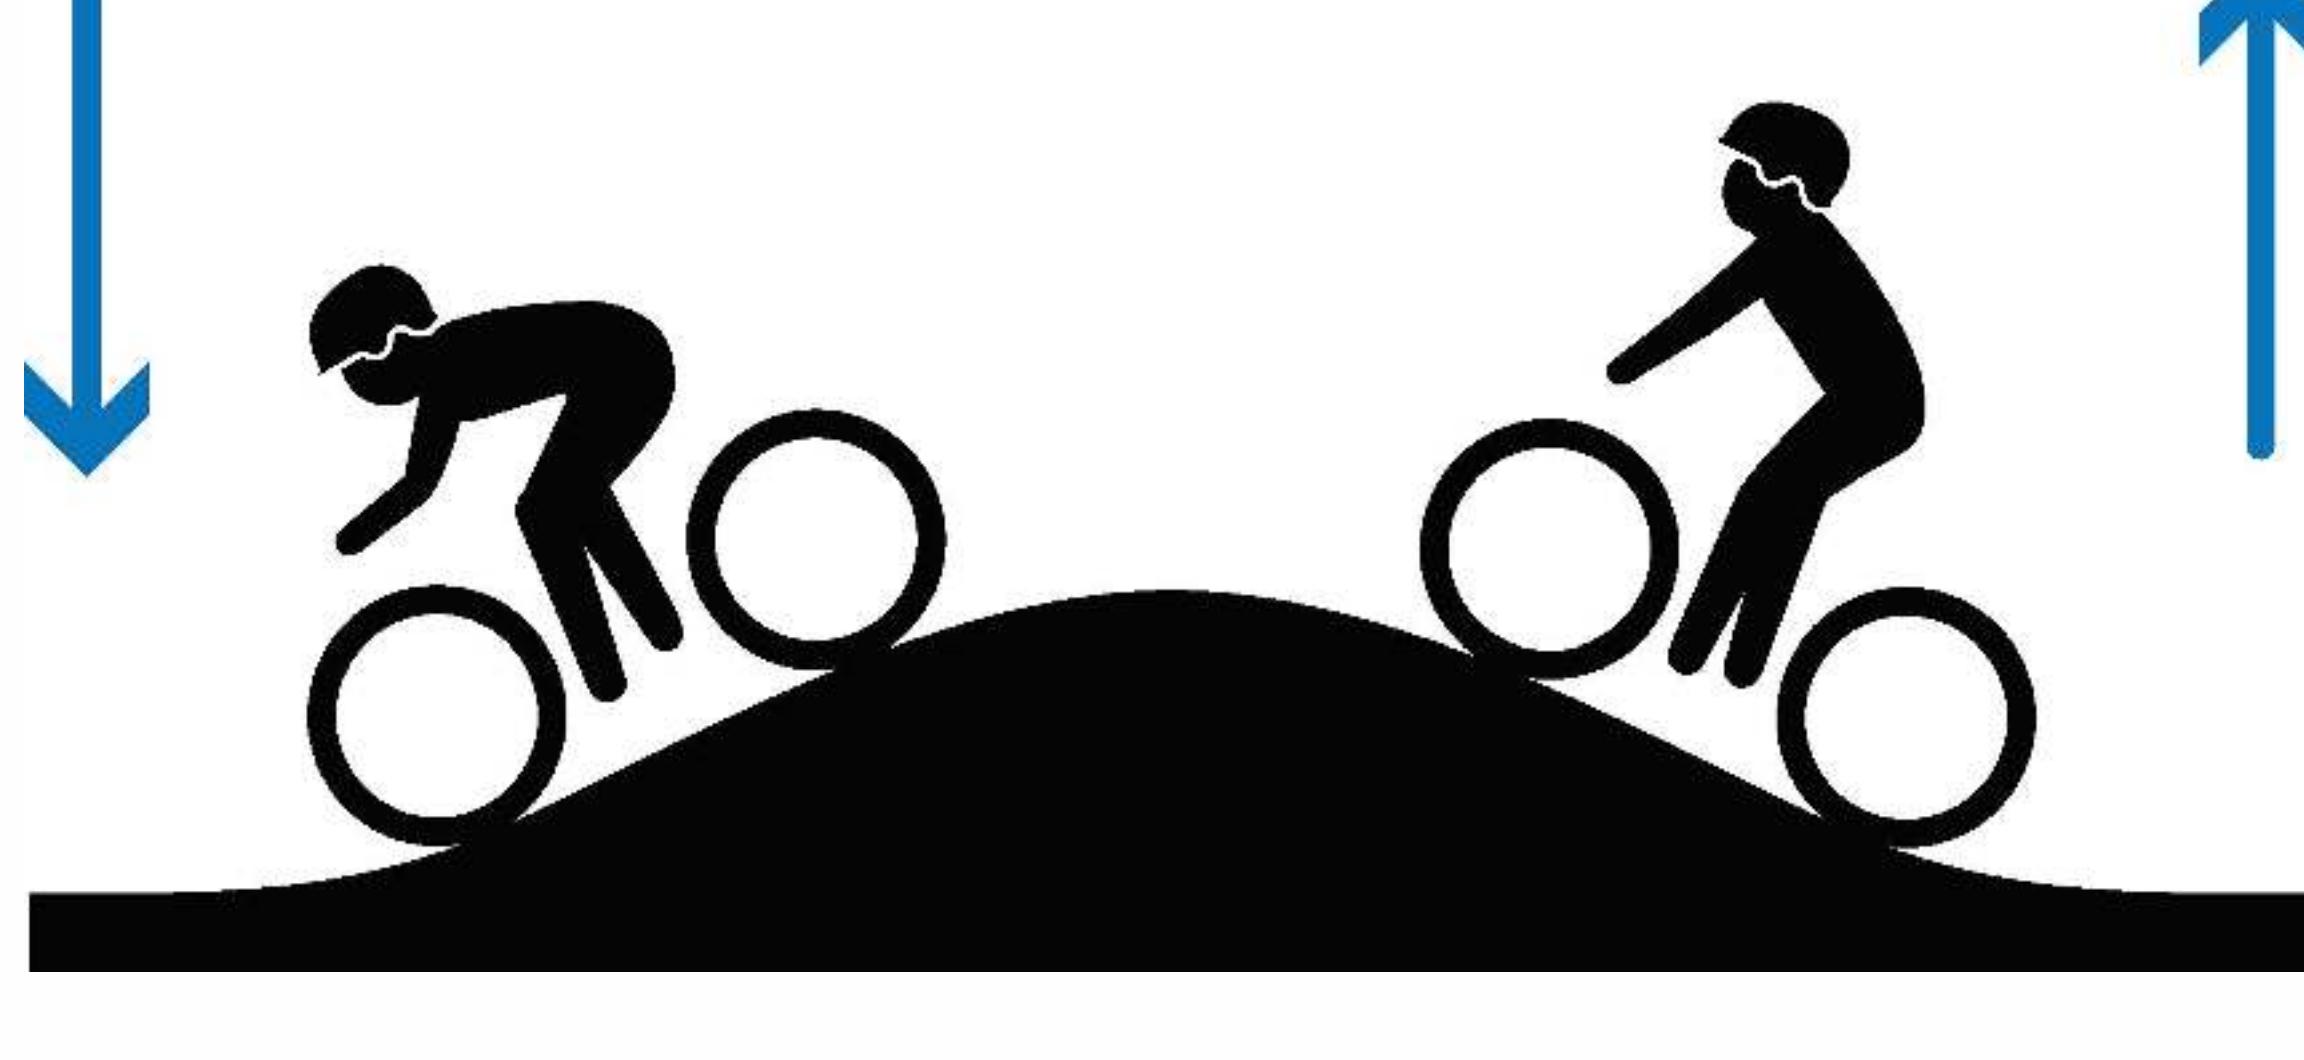

A pump track is a continuous loop of rollers, berms and jumps around which riders can ride bicycles, skateboards, roller-blades, etc. by using a pumping motion. Its diversity enables fun riding experience in a safe and controlled environment. By using a pumping motion, riders are able to maintain their speed around the pump track without pedalling.
